PROGRAM 2013

The Culture(s) of Sustainability

The 5th Sustainable Summer School consists of 5 project workshops, expert presentations and discussions. The theme of the program in 2013 will be »The Culture(s) of Sustainability« and we will discuss questions like: What is sustainability? Is it a technological or a creative challenge? Is it a political or an economic task? Is it a question of tradition or innovation? We believe that culture is and cultures are the basis for the columns of sustainability.

Sunday, August 25

- 16.00 meeting at Düsseldorf central station, transfer to the Nikolaus Monastery
